TERRAZZO TILES
BY IDEAL STONE

WHAT IS TERRAZZO?

Terrazzo is versatile flooring and wall material made from precast recycled marble chipping embedded in a white or pigmented cement base. It is mechanically polished without the use of chemicals to create a smooth, uniform surface, making it an ecologically-friendly and low maintenance option.

IDEAL STONE Terrazzo is one of the most durable flooring materials available today. Once pressed and polished properly, the material is impervious to water and stain damage. It also does not chip away like other materials. With the increase in popularity of this material, architects turn to terrazzo. Even if terrazzo is worn down over the years, it can be re-finished and polished to look as good as new. When considering the low maintenance of terrazzo, it provides a long-lasting product at an affordable price.

We manufacture standard tile sizes ranging from 30*30 cm up to 50*50 cm, and thickness sizes at 20. In addition to standard thickness, other custom thicknesses are also available.

TERRAZZO TILES BY IDEAL STONE

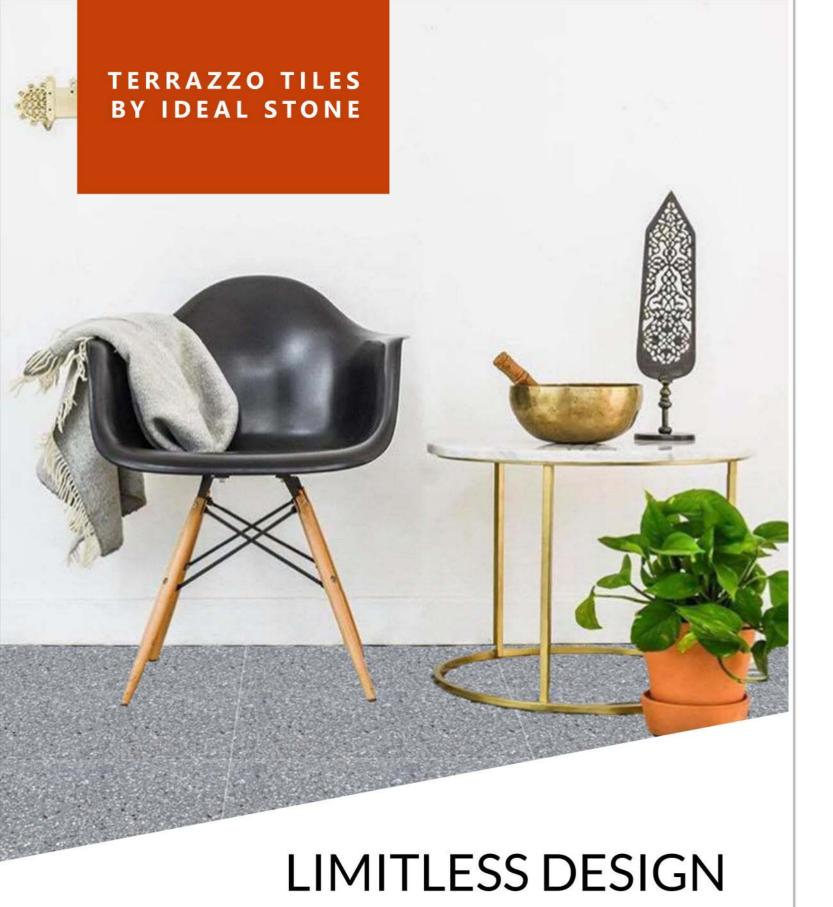

TERRAZZO FINISHES

Ideal Stone tiles Finish comes as polished, and brushed. The polished finish has a smooth glossy surface, but the brushed finish has a rough textured surface.

INDOOR AND OUTDOOR APPLICATION

Installers can apply terrazzo in both indoor and outdoor settings. Today you can find this flooring material in high traffic areas such as lobbies, hallways, and so on. Terrazzo can meet installers' needs to fit their style.

. Because terrazzo is manufactured by mixing different elements together, you can choose almost any design or color for any project. This allows architects to include abstract decorative designs, during the terrazzo installation.

TECHNICAL DATA

TILES SPECIFICATIONS

SIZES	THICKNESS	WEIGHT/ SQ.M.	TILES/SQ.M.	UASGE	FINISH
30*30 cm	20 mm		11	Indoor- outdoor	Polished brushed
40*40 cm	20 mm		6.25	Indoor- outdoor	Polished brushed
50*50 cm	20 mm		4	Indoor- outdoor	Polished brushed

TECHNICAL TEST RESULTS

TEST	AVG. RESULT	STANDARD SPECIFICATIONS RANGE	
		NORMAL USE	HEAVY DUTY USE
Abrasion	1.5mm loss	5.2mm max loss	3mm max loss
Bending/Flexural Strength	86.07 kg/cm2	At least 40 kg/cm2	At least 50 kg/cm2
Water Absorption	4.74%		Not more than 10%
